EDUCATION

Computer Technician   2014-2019
Instituto Politécnico Modelo, Buenos Aires

During this timeframe, I successfully completed my secondary education, earning the title of Computer Technician. I acquired specialized programming skills, garnering extensive experience in developing various types of websites and designing and programming robotic systems. Furthermore, I have engaged with diverse electronic components, broadening my knowledge and skills in the technological domain.

Systems Ingeneer   2020-Act
Universidad Tecnológica Nacional, Buenos Aires

I am currently in the third year of the Information Systems Engineering program. Throughout this academic period, I have expanded my expertise in pivotal areas, including software development, information systems management, and the implementation of innovative technological solutions. My commitment to academic excellence is evident through active involvement in research projects and the practical application of acquired skills in real-world environments.

This sustained dedication to my education underscores my commitment to staying abreast of the latest trends and advancements in the field of information systems engineering.

WORK EXPERIENCE

Manager of registrations in a system   2021 - 2022
Movistar Subcontractor

As a registrations system manager, I supervised the planning of project polygons to ensure successful implementation. Furthermore, I created plans and technical documentation to guarantee precision and compliance with standards.

Plan Certification   2022-2023
Movistar Subcontractor

As a Plan Certification Manager, I specialized in reviewing and validating architectural and technical plans, ensuring adherence to regulations and standards. My emphasis on precision and collaborative efforts significantly contributed to the success of projects, maintaining the integrity of technical documentation.

PROYECTS

Beyond my work experience, I've undertaken a variety of projects that have enhanced my proficiency in working with different technologies. You can explore these projects on my website, conveniently linked at the beginning of this document.
